

Description

Juana Mariana Vazquez immunization registry provided Evaluated History and Forecast is reconciled with the Immunization history information in the EMR.

Comments

No Comments

Pre-condition

A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR. and the response is available in the EMR for reconciliation and import.

Post-Condition

Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juana Mariana Vazquez)

Test Objectives

Request/Receive Patient Immunization Data and Identify Source: The EHR or other clinical software is able to store immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient. The EHR is able to display the immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Review Patient Immunization History: To assist with the ordering process, the EHR or other clinical software system allows a user to specify standard views of patient immunization information for each vaccine dose administration, including patient-specific data (e.g., age on dates of administration, etc.).

Support for:

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

1. The user imports the vaccination, date administered, and documents adverse reactions reconciled from the returned vaccinations as follows:

a. Vaccinations NOT imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 45) administered 12/20/2013

measles, mumps, and rubella virus vaccine (CVX 03) administered 8/22/2014

diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 11/20/2017 [known only to EMR, not available from IIS]

poliovirus vaccine, inactivated (CVX 10) administered 2/21/2015 [known only to EMR, not available from IIS]

Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 140) administered 10/15/2017 [known only to EMR, not available from IIS]

b. Vaccinations Imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 11/01/2013
hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 05/20/2014

diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 1/22/2014
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 3/23/2014
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 5/22/2014
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 2/21/2015

Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 1/22/2014
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 3/23/2014
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 5/22/2014
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 11/21/2014

poliovirus vaccine, inactivated (CVX 10) administered 1/22/2014
poliovirus vaccine, inactivated (CVX 10) administered 3/23/2014

pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/22/2014
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 3/23/2014
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 5/22/2014
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/11/2015

rotavirus, live, monovalent vaccine (CVX 119) administered 1/22/2014
rotavirus, live, monovalent vaccine (CVX 119) administered 3/23/2014

Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 9/25/2014
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/29/2014
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/2/2015
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 11/4/2016

hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 11/23/2014
hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 5/23/2015
measles, mumps, rubella virus vaccine (CVX 03) administered 11/22/2017

Varicella virus vaccine (CVX 21) administered 12/15/2015

2. The tester verifies that the Reconciled Patient Immunization History can be displayed to the user.
