

**Description**

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes deferrals for the vaccines that were due this visit indicating the medical reason. The report MAY send the immunizations that the EMR imported from the IIS.

**Comments**

No Comments

**Pre-condition**

The vaccines for the visit have been deferred.

**Post-Condition**

The IIS has received the vaccine information (Z22 message).

**Test Objectives**

**Transmit Standard Patient Immunization History Report:** The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's immunization history to public health immunization registries.

**Link Standard Codes to Immunization Data:** The EHR or other clinical software system links standard codes to discrete data elements associated with an immunization.

- a. NDC codes, CVX for immunizations.

**Evaluation Criteria**

Evaluation criteria is defined within each test step.
