

**Description**

The physician accesses the record for Juana Mariana Vazquez and:

- Selects order for Influenza vaccine.

**Comments**

This order is a pre-condition to the following two steps related to recording the Influenza vaccine.

**Pre-condition**

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EHR.

**Post-Condition**

Influenza order entered in patient record.

**Test Objectives**

**Enter Vaccination Order:** The EHR or other clinical software system allows providers to order immunizations for a patient using filters for type of vaccine, including combination vaccines.

**Evaluation Criteria**

The EHR records the following order information. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:
