

Description

The physician accesses the record for Juana Mariana Vazquez and:

- Displays the registry forecast as returned by the immunization registry.

Comments

No Comments

Pre-condition

A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR.

Post-Condition

Immunization Forecast returned from the registry has been displayed to the user.

Test Objectives

View Immunization Forecast: The system provides a view of the immunization forecast provided by the public health immunization registry (IIS). The display includes the forecast from the registry and includes recommended vaccination dates, minimum (earliest) date, date due, and maximum (latest) date for each vaccine included in the forecast.

Evaluation Criteria

1. The EMR displays the information returned from the Immunization Registry according to the Juror Document.
2. Verify that all forecast vaccines and dates returned by the registry are displayed to the user.

Notes

The verification content for the vaccine forecast also is part of the juror document in the prior step 3: View and Compare response to request for vaccination history for Juana Mariana Vazquez. The criteria for this step is tested separately here and graded only with respect to the vaccine forecast. Date when Vaccine Overdue may be omitted for the Influenza Vaccine.

For MMR, the 2nd dose is due 10/31/18 according to the schedule. Since the first one was given too early, the child is behind. Verify that the EMR shows all 3 dates returned by the registry:

- Earliest Date to Give
- Vaccine Due Date

- Date When Vaccine Overdue
