

Description

The nurse documents administration route for the IM inactivated influenza vaccine as 'intranasal'

- Is prevented from documenting "intranasal" for intramuscular inactivated influenza vaccine

Comments

This step covers data quality checking as an informative aspect of vaccine administration

Pre-condition

Order is placed for intramuscular inactivated influenza vaccine.

Post-Condition

The intramuscular, inactivated influenza vaccination route has failed to be recorded as intranasal in the EMR.

Test Objectives

Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, product, lot number, manufacturer, Vaccine Information Statement date, and quantity of vaccine/dose size.

Sample of data quality checking for vaccine route.

Evaluation Criteria

The EMR prevents the user from entering 'Intranasal' as a route for the the intramuscular ,inactivated influenza vaccine.
