Description

The mother is concerned about administering the IPV due to the prior adverse reaction and refuses to have the child immunized for IPV. The provider documents mother's refusal for IPV vaccine indicating the parent decision, the reason and documents a deferral at the time of attempted administration.

No Comments

Pre-condition

Prior Immunization History loaded and reconciled from the Immunization Registry. Order is entered for IPV. Provider has been alerted to prior adverse reaction to IPV of febrile seizures.

Post-Condition

Vaccine non-administration due to parental refusal is documented in the patient record. Deferral is recorded.

Test Objectives

Record Vaccine Administration Deferral: The EHR or other clinical software system allows a user to enter a reason or reasons why a specific immunization was not given to a patient (e.g., due to contraindication, refusal, etc.). The system also stores that information in a structured way so it can be reported and analyzed as needed.

Evaluation Criteria

EMR documents the non-administration of the IPV due to the parental refusal. The coded values are not expected to be displayed to the user, but it is expected that the value selected has the identified meaning, and it is expected that the system will use the coded value when the attribute is conveyed in later transactions:

Substance/Treatment Refusal Reason	Parental decision (NIP002 00)
Completion Status	RE
Date/Time Vaccine Deferral was recorded	Current Date
Deferral Reason	Parental decision (NIP002 00)
Deferral Status	Deferred
